

Assignment 1: Introduction to Data Exploration

Carly Rauh

OVERVIEW

This exercise accompanies the introductory material in Environmental Data Exploration.

Directions

1. Rename this file `<FirstLast>_A01_Introduction.Rmd` (replacing `<FirstLast>` with your first and last name).
2. Change “Student Name” on line 3 (above) with your name.
3. Work through the steps, **creating code and output** that fulfill each instruction.
4. Be sure to **answer the questions** in this assignment document.
5. When you have completed the assignment, **Knit** the text and code into a single PDF file.
6. After Knitting, submit the completed exercise (PDF file) to the appropriate assignment section on Canvas.

1) Discussion Questions

Enter answers to the questions just below the `>Answer:` prompt.

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I have taken multiple classes in the past that have used R and I also used R for my senior thesis project so I feel comfortable using R. I have never used Git before. I have worked with data analytics a little bit in the past, cleaning and preparing data, but not much.

2. Are there any components of the course about which you feel confident?

Answer: I feel confident navigating the basic interface of RStudio.

3. Are there any components of the course about which you feel apprehensive?

Answer: I feel apprehensive about the flipped style of the course, as it is a mode that I am unfamiliar with and how that will impact my time management. I am also apprehensive or nervous about using Git and GitHub since I am unfamiliar with those platforms.

2) GitHub

Go over Tasks 1.1. through 1.6 on Course Setup page. Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file, committed those changes, and pushed them to your GitHub account.

Answer: https://github.com/carlyrauh/EDE_R_Lab_F26.git

3) Knitting

When you have completed this document, click the `knit` button. This should produce a PDF copy of your markdown document. Submit this PDF to Canvas
